

i407-WRA-JL

7-inch Multimedia Receiver for the New 2018-Up Jeep® Wrangler and 2020-Up Jeep® Gladiator

PRODUCT OVERVIEW

Enhance your adventures with this custom-designed dash solution that gives you HD Radio, HDMI, and Maestro Compatibility in your Jeep® Wrangler or Jeep® Gladiator.

PRODUCT FEATURES

Custom-Fit Solution – This custom designed dash kit replaces your factory radio and includes Jeep-specific wiring adapters that plug directly into your factory setup for a Plug-and-Play installation.

Upgraded Tech – Apple CarPlay®, Android Auto™, and Bluetooth® hands-free calling and music streaming can be controlled with voice commands so you can access your phone calls, text messages, and more with a simple voice command on the included external microphone. Use your smartphone for third-party navigation apps like Google Maps or Waze.

Customizable Screen – Customize the screen exactly the way you want it by using drag-and-drop motions with your finger to add, remove, or move over 29 available widgets. You can prioritize your three home screens so you can quickly find the apps you want like Apple CarPlay®, Android Auto™, Camera, Bluetooth® functions, and more. Add a customizable wallpaper from your photos through a thumb drive.

Retains Factory Controls – The included iDatalink adapter can integrate with the Jeep® diagnostic port so select vehicle information like tire pressure, battery voltage, door status, engine codes, and user-customizable gauges can be monitored on the i407-WRA-JK. The i407-WRA-JL also retains the factory backup camera with rear-guideline display. Retain the Alpine OEM Premium Amplified System with the KCX-F200INT Premium Audio System Interface (sold separately).
